PROFESSIONAL SUMMARY

Backend-leaning full-stack developer with 2+ years of production experience designing and shipping **.NET / ASP.NET Core backend services, REST APIs, and database-backed business logic**. At Anan Alsamaa IT Solutions, own backend systems processing **20,000+ real-time orders/day** across .NET and Laravel stacks — including a fault-tolerant .NET + MSSQL order-processing service spanning internal POS systems and external delivery partners. Comfortable across EF Core, ASP.NET Identity / JWT, MSSQL, React + TypeScript, and Agile delivery practices. Currently completing the Microsoft Full-Stack Developer Professional Certificate to deepen the .NET toolchain (Azure, Blazor, EF Core, Identity) and reinforcing the stack through personal projects in ASP.NET Core + SQL Server.

WORK EXPERIENCE

Full-Stack Developer · Anan Alsamaa IT Solutions (Althawaqh Food Co.), Dammam, KSA
Jun 2025 – Present

.NET / ASP.NET Core Backend Services & REST APIs

- **Engineered the company's fault-tolerant .NET + MSSQL order-processing backend, now handling 10,000+ orders/day** — REST APIs with multi-layer failure handling, retry logic, and automated email alerting on revenue-critical paths; designed both internal and partner-facing services, built the data layer over MSSQL, and own production deployment.
- **Shipped self-service operational REST endpoints in .NET** for branch- and brand-level data synchronization across the company's POS systems — supervisors now onboard individual stores or full brand sets without engineering involvement.
- **Co-designed the cross-system integration architecture** for the company-wide POS migration — restructured the backend so one service layer serves both legacy and new POS systems without code duplication.
- **Built and own a Laravel + PostgreSQL delivery integration platform handling another 10,000+ orders/day** — menu sync and multi-POS order-routing logic with end-to-end ownership from ingestion to dispatch.

Full-Stack Web Application Development

- Rebuilt the OPCA branch-management system from a legacy codebase to a modern web stack on **PostgreSQL**; rolled out to multiple production stores and made the system maintainable by the wider dev team.
- Built a **WebSocket**-driven real-time delivery-driver management app — converted a previously dependent module into a standalone live-tracking application with location and status updates.
- Built an API-driven live order monitoring dashboard rendered on kitchen TV screens; built order management interfaces from scratch; deployed the coupon manager tooling with controlled external access.
- Developed supervisor reporting workflows by integrating the **YiJi portal APIs** — automated operational report generation that removed manual engineering handoffs; performed QA/QC on the YiJi mobile portal.

Production Operations

- **Manage deployments across pre-production, staging, and production environments via VPC** — application servers, PostgreSQL and MSSQL databases, cPanel / Bluehost hosting; hands-on server configuration, troubleshooting, and maintenance of revenue-critical pipelines.

Freelance Full-Stack Developer · Eftychia Technologies Pvt. Ltd
Jul 2024 – Apr 2025

- Delivered full-stack feature work across 3–4 concurrent client projects, integrating React frontends with Node.js / Express backends and MongoDB data layers.

- Refactored high-traffic REST API endpoints and database query plans, measurably reducing response times and improving long-term maintainability.
- Performed QA and database testing for a client engagement with Winman Software (India's leading CA-ERP suite) — executing MSSQL test cases and debugging data integrity issues.

Technical Intern · AI Rushaid Technologies

Jan – Feb 2024

- Contributed to live ERP, AI, and blockchain solution development inside a large industrial-technology group; supported server administration, networking, and security monitoring.

SELECTED PROJECTS

FinShark — Full-Stack Stock Market & Social Platform · ASP.NET Core · EF Core · SQL Server · React + TypeScript

github.com/CodeByEmad/FinShark

- Architected a full-stack platform with an **ASP.NET Core Web API** backend, **Entity Framework Core** data layer, **SQL Server** database, and a **React + TypeScript** frontend.
- Implemented **JWT authentication** with **ASP.NET Identity**, REST endpoints for stock data and user-generated content (portfolios, comments), and end-to-end frontend integration with the backend APIs.
- Maintained detailed daily engineering logs and architecture documentation throughout the build to track design decisions and trade-offs.

Twitter Clone — Full-Stack Social Media Application · MERN · JWT · Cloudinary

twitter-clone-255w.onrender.com · github.com/CodeByEmad/twitter-clone

- Full-stack social media app with JWT auth, post management, follow graph, and Cloudinary image uploads. Deployed on Render.

Genius AI — AI SaaS Platform · Next.js · Clerk · OpenAI APIs

github.com/CodeByEmad/GeniusAI

- Production AI SaaS using Next.js 13, Tailwind, and Clerk auth — integrated GPT-3.5-turbo (chat), DALL·E (image generation), and a code assistant. Live on Vercel.

TECHNICAL SKILLS

Languages	C#, JavaScript, TypeScript, PHP, Python, SQL
.NET / Backend	ASP.NET Core Web API, Entity Framework Core, ASP.NET Identity, JWT, Node.js (Express), Laravel
Frontend	React, TypeScript, Next.js, Tailwind CSS, Bootstrap, HTML5, CSS3
Databases	MSSQL, PostgreSQL, MySQL, MongoDB
APIs & Real-Time	REST API design, WebSockets, Third-party Aggregator Integrations (Keeta, Ninja, Toyou)
DevOps & CI/CD	Git, Docker, CI/CD, AWS, VPC Server Management, cPanel, Bluehost, Vercel, Render, Postman

EDUCATION

B.Eng. Computer Science Engineering · NMAM Institute of Technology

Graduated 2025 · SGPA 3.4 / 4.0

CERTIFICATIONS

- **Microsoft Full-Stack Developer Professional Certificate (*In Progress*)** · .NET, ASP.NET Core, EF Core, ASP.NET Identity, Azure
- **Web Applications for Everybody Specialization** — University of Michigan (Coursera) · PHP, MySQL, JavaScript
- **IBM Data Science Professional Certificate** · Python, SQL, Data Analysis, Machine Learning

ACTIVITIES & VOLUNTEERING

Google AI Summit (Dhahran) · Hidayah Foundation (Core Member) · Toastmasters International
